

SafeSeal DuoPro: The 2-in-1 solution for safe containment

The SafeSeal DuoPro from Lugaia is an innovative 2-in-1 containment tool designed for the safe and efficient sealing of containment bags and liners in pharmaceutical and biotechnology processes.

Advantages & Key Features:

- **Combined crimp and cut functionality:** Two operations in one tool for efficient and secure sealing in pharmaceutical processes.
- **High process reliability:** Defined crimping force ensures reproducible, GMP-compliant results every time.
- **Easy manual operation:** Intuitive handling without additional tools, ideal for isolators and cleanrooms.
- **Lightweight and ergonomic:** Comfortable to use thanks to low weight and optimized design.
- **Versatile application:** One device for crimp sizes S and M, adaptable to a wide range of requirements.
- **Compatible with the Lugaia SafeSeal System:** Seamless integration into existing containment solutions.
- **Maximum safety:** Meets OEB-5 containment requirements to protect personnel, product and environment when working with highly potent compounds.

SafeSeal DuoPro in action - secure crimping and cutting for reliable OEB-5 containment.

Process - How it works (4 steps)

1. Position the crimp in the SafeSeal DuoPro.

2. Press the crimp with defined sealing force.

3. Cut the crimp for a safe separation.

4. Remove the sealed crimp - ready for the next process step.
